

Adjusts like a "mike" Holds like a vise

A handy wrench, a practical wrench, a strong wrench, for the motorist or the shop man.

Turning the handle does not merely give fine adjustment—it locks the jaws onto the nut. The special steel head is in the form of a split socket that provides openings of any size from $\frac{1}{4}$ " to 2".

No threads to burr, no recesses or springs to clog, no sockets to attach—built for hard use.

Operated with one hand and covers a wide variety of use.

A big value at \$3.50.

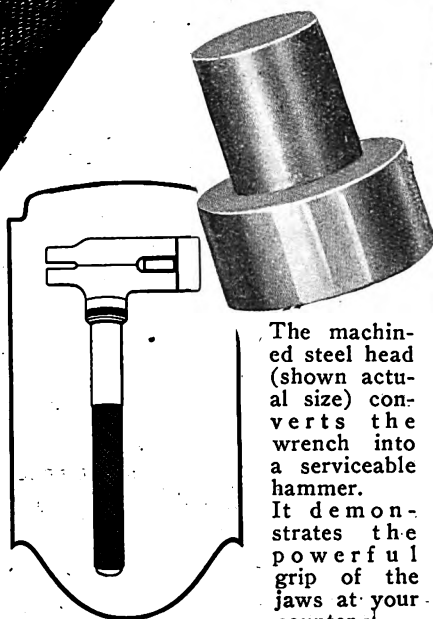

XCEL Adjustable SOCKET WRENCH

"The Wrench of a Thousand Adjustments"
